

Dear Sir or Madam:

On September 16, 2015, the Agency for Toxic Substances and Disease Registry's (ATSDR) journal article "Evaluation of contaminated drinking water and male breast cancer at Marine Corps Base Camp Lejeune, North Carolina: A case control study" was published (<http://www.atsdr.cdc.gov/sites/lejeune/MaleBreastCancerStudy.html>).

The purpose of this study was to determine if Marines who were exposed in the past to contaminated drinking water at Camp Lejeune were more likely to have male breast cancer.

This study is one of several health initiatives that ATSDR is expected to complete in the next several years. For more information about these studies, visit <http://www.atsdr.cdc.gov/sites/lejeune/> or call ATSDR at (800) 232-4636.

Since 1991, the Marine Corps has supported the health initiatives conducted by various scientific agencies. We are also working diligently to identify and notify individuals who, in the past, may have been exposed to the chemicals in drinking water at Camp Lejeune. For more information about these efforts or to update your contact information, please see: <http://www.marines.mil/clwater/> or contact the Camp Lejeune Historic Drinking Water Call Center at (877) 261-9782 or e-mail clwater@usmc.mil. Please share this information with anyone that may have been at Camp Lejeune in 1987 or prior and encourage them to register with us.

To contact the Department of Veterans Affairs to learn more about health care benefits, please visit <http://www.publichealth.va.gov/exposures/camp-lejeune/> or call (877) 222-8387 (Healthcare) or (800) 827-1000 (Benefits). Family members can visit <https://www.clfamilymembers.fsc.va.gov> or call (866) 372-1144.

Sincerely,

The Camp Lejeune Historic Drinking Water Program
